## Summary

As an aspiring young photographer, I focus mainly on capturing nature, sports, and theater performances. Future projects include working with models to add to my tool belt. I spend my weekends as a volunteer photographer at Cornerstone Community Church and my weekdays attending Canon Workshops and shooting as much as I possibly can. It's not necessarily the healthiest, and my sleep schedule isn't always the happiest, but I find that the sacrifice of 5 hours of sleep is always worth the photos I get out of it. I have experience working with different camera models in a variety of settings. I am slowly working on starting to shoot models and how to go about it. I'm always looking at ways to improve my photo-taking, editing, and video.

## Goal

My focus is to provide quality projects to my clients. I hope that I can help meet the needs of you and your current project.

## Experience

<b>Videographer</b> , NA, Southern CA	2017-Pres.
